Closing Sentences : The above reasons help explain the stimulation of Asian women for the foreigner.

***Now let's write a unified paragraph
from this given topic.***

<i>Why Do Foreign Men Like Asian Women ?</i>

Asian women have a fascination for Western men, which may include these reasons. First, Asian women are more dutiful toward their husbands traditionally. They regard their husbands as their older brothers, as their sons and take good care of them. Asian women are taught to regard son as more important than themselves. Second, Asian women still have a traditional feminine virtue. They continue to support their husbands and look after their children. To many Asian women, the home and the family are still most important. Third and last, Asian women still are more exciting than Western women because familiarity breed contempt. A foreign visitor only meets most Asian women in their homelands; therefore, he knows little about them and desires them for what he's seen. The above reasons help explain the stimulation of Asian women for the foreigners.

Closing Sentences: *The above are among the most essential qualities which couple try to find.*

This is also a good example of a unified paragraph. Read and review its construction carefully.

The Qualities of a Good Husband or Wife

Nowadays, ***people*** try to find the following qualities in each other. **First, they desire to find understanding.** Understanding is important in a marriage. Marriages fail whenever a couple fails or refuses to understand each other. **Second, they desire someone who is patient.** Understanding cannot occur while one or both persons loses their temper, so patience is certainly required. **Third, the partner should be imaginative.** Imagination can add excitement to a marriage and save it from collapse. **Last, the partners should be faithful to each other.** Although changing oneself is important, each person should only dress and disguise in order to excite the companion to love him or her more. **The above are among the most essential qualities which people try to find in each other, or themselves.**

Democracy

Democracy is system of checks and balances by which the citizens of a nation can determine the course of their action, by strictly following the three principles of government. The first principle is government by the people and implies that the people have able right to determine what their representatives must do for them. However, this can only be done by observing governments in progress and following up all activities thoroughly. So long as a representative is aware that he or she is “having watched closely,” he or she has no choice but to benefit the constituency. Together with this is the second principle called government of the people. It means that the most suitable government for ordinary people is a government consisting of ordinary people. Truly, only poor people understand the problems of poor people; henceforth, it is unwise to elect a tycoon to represent a poor constituency unless he or she is a real philanthropist. While the two former theories are in progress, the representatives elected to the government should always recall that they were elected by “popular mandate” and have the requirement to follow up on it. By strictly practicing according to the

Unified Paragraph***Should Thailand Have More Holidays ?***

The following serious consideration should make Thai people and their government reconsider about adding holidays to the calendar. First, the recent automobile accidents en route to the provinces for Songkhran festival this year and the injuries from crushed ice and water as well as from menthol in the water itself have shown that the “holiday spirit” has turned malignant and caused accidents needlessly. Adding more holidays could lead to further accidents in the future. Second, there are people in Thai society who do little for themselves or society and are very listless. Adding holidays would very likely make them even lazier, as they would not work very hard on those days. Instead, holidays should be awarded for hardworking persons only. Last, people already spend too much money preparing for existing holidays. (Thailand has three New Year holidays, for example, which require heavy spending.) Adding holidays would further deplete the budget of those people. Such serious considerations as these ought to make the Thai people, generally, reconsider adding new days.
